U.A. 4

The cutting of IMPRINT in 1912 was an event of great typographical importance for, amidst so much duplication of old style and modern faces, this was the first original book type to be designed specially for mechanical composition. Its success proved not only that it was possible to draw and cut new type designs pantographically by engraving machines, but also that mechanically-set type could rival in appearance the best examples of hand composition, Gerald Meynell, founder-editor of *The Imprint*, persuaded the Corporation to cut this face for use in his magazine. In collaboration with Edward Johnston and J. H. Mason, Series 101 was redrawn from an old face of the late 18th century. *Fundamentally a smoother and rounder version of Caslon's old face, it is somewhat larger on the body than most old faces.*
